

Specialists in Sludge Dewatering

CENTRIFUGE SALES

Centrifuge Sales

Euroby is the UK and Irish Agent for Flottweg GmbH & Co. KGaA, supplying the company's comprehensive range of dewatering and thickening centrifuges for all applications and types of materials.

Decanter

Horizontal solid bowl centrifuge for continuous 2-phase separation of solids from liquids such as thickening and dewatering sludge, suspensions with granular solids, clarification of liquids, classification of fine pigments, etc. Capacities to 250 m³/h.

Typical applications – Dewatering and thickening of sludge from municipal and industrial waste water, production of plastics (PVC, HDPE, etc.), recovering of animal and vegetal basic products (oils/fats, starch, proteins) beverages (wine, beer, fruit/vegetable juices)

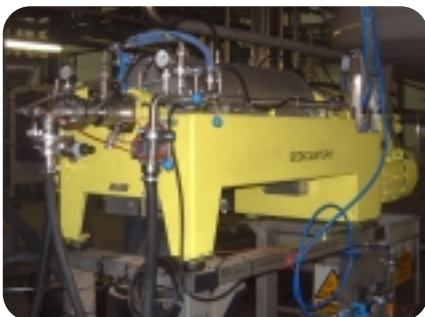

Tricanter®

Horizontal solid bowl centrifuge for continuous 3-phase separation of two immiscible liquids with different densities and a solids phase. Capacities to 80m³/h

Typical applications – Oil sludges, recovery of animal /vegetable oils and fats, wheat starch/gluten separation, etc.

Sedicanter®

Horizontal high 'g' force solid bowl centrifuge for continuous separation of suspended fines from liquids with pasty or slimy sediments. Capacities to 50m³/h.

Typical applications – Fermentation broth with yeast or bacteria, protein suspension etc.

Specialists in Sludge Dewatering

Sorticanter®

Special horizontal solid bowl centrifuge for continuous 3-phase separation of solids with different densities from liquid phase. Capacities to 1,000 kg/h solids, depending on the properties of the raw material.

Typical applications – Plastic recycling, kitchen waste

Separator

Disc stack separator with self cleaning bowl for continuous separating of two immiscible liquids and simultaneous solids separation. Capacities to 85 m³/hr.

Typical applications – Beverage industry, chemistry, pharmaceuticals, animal/vegetable oils and fats, mineral oil etc.

Mobile Dewatering

Try before you buy or just rent. Mobile/semi mobile centrifuges available in a few days. Ideal for capacity shortfall during breakdowns, planned maintenance or delivery of new equipment. Capacities of 15m³/hr – 90m³/hr
